Caravan Services**

Mobile Servicing Price List 2015

Chassis Service - £55.00

This includes a check of operation (and lubrication where applicable) of the handbrake, hitch and towing mechanism, brake linkages, corner steadies and a general inspection of the chassis condition. A visual inspection is carried out of the tyres and gas pipes for signs of deterioration and tyre pressures are checked. It also ensures that wheel nuts are torqued to the correct torque. This type of service is the minimum recommended for caravans that are on seasonal pitches and are not towed on public roads.

Road Chassis Service - Single Axle £86.00 Twin Axle £106.00

In addition to the Chassis Service this service ensures your caravan's roadworthiness and includes brake drums, damper and exterior road lights. It includes a visual brake and drum inspection and brake adjustments.

Electric and Gas Equipment Check - £86.00

This service checks the operation of all gas and electrical systems including appliances and water system operation.

Damp Report - £40.00

Your caravan will be tested for signs of water ingress and a detailed report will be supplied.

Full Service - Single Axle £162.00 Twin Axle £182.00

This service consists of the Road Chassis Service, Electric and Gas Equipment Check and Damp Report.

Winter Drain Down - £25.00

A Drain Down Service before the onset of winter will greatly reduce the risk of damage caused by a cold spell. However, the results of frost and freezing damage remain wholly the responsibility of the caravan owner and sometimes cannot be avoided.

Powrtouch Caravan Movers

We can supply and fit Powrtouch caravan movers, please ask for a price list. We can also fit and repair all types of caravan mover including Purpleline, Truma or Reich. Please ask for further information.

Exterior Caravan Washes – Single Axle £39.00 Twin Axle £44.00 Retreats £52.00

Exterior caravan washes can be carried out at your home, place of work or storage facility – we are fully insured and do not use pressure washers.

Additional work is carried out at a rate of £37.00 per hour. All prices quoted are not subject to VAT. Servicing charges DO NOT include items such as stub axle nuts, gas hose, batteries, bulbs or other consumables; these are replaced as standard during certain services and will be charged for separately on your invoice.

Callout charges will vary depending on location. However, we are regularly visiting most areas in the South West and will endeavour to keep this cost to a minimum. We are happy for customers to share a callout fee if two or more jobs can be done during one visit.
